Joyce & Curt,

Just a follow up to our meeting additional test pitting will be conducted in the sludge to get a better handle on the limits and assess if we have potential hazardous waste that needs to go to NE. Please find attached the draft of the EM maps with coordinates for the areas to be test pitted. Please advise if there are any areas we missed or others that you would like to add. Once we complete excavations/drum removals and test pitting we will have the limits resurveyed based on stakes in the field and then overlay the limits on the EM maps for additional verification. Please let me know if you have any questions.

Thanks TJK
